LOTTE ADVANCED MATERIALS EUROPE GMBH - REPRESENTATIVE OFFICE(DUBAI)

# LOTTE ADVANCED MATERIALS

Originally established in 1954 as Cheil Industries, the Samsung Group launched its chemical-business units in 1988 as part of an overall business expansion strategy.

In 1992, the company commenced the manufacture of acrylic solid surface products marketed under the "Staron" brand, followed by the introduction of the Tempest Collection launched in 2006. The Samsung Group further expanded its decorative surfaces portfolio by introducing "Radianz" engineered, natural quartz surfaces in 2009.

With its drive to become a global supplier of top-tier decorative surfacing materials, Lotte Chemical Corporation launched LOTTE ADVANCED MATERIALS in May of 2016 through its acquisition of Samsung Chemical.

**LOTTE ADVANCED MATERIALS,**  
A creator of  
high-quality materials  
and refined sensibilities.

# 2019 LOTTE ADVANCED MATERIALS

LOTTE ADVANCED MATERIALS built up ABS and PS plants in 1989, signaling its first major step into the market. Since then, the company has been expanding its business rapidly in a variety of categories including PC.

<b>1989</b> ABS & PS plants completed	<b>1993</b> Acrylic solid surface material plant completed	<b>2006</b> Polycarbonate plant completed	<b>2008</b> Compounding plant in Mexico completed
<b>2014</b> Compounding plant in Dongguan, China completed	<b>2011</b> Compounding plant in Hungary completed	<b>2010</b> Compounding plant in Tianjin, China completed	<b>2009</b> Quartz Surfaces factory established

# STRETCH YOUR IMAGINATION TO EXPERIENCE THE POSSIBILITIES WITH STARON.

## WHY STARON ?

Staron solid surfaces boast dimensional flexibility and low maintenance that ascertain its durability for a multitude of interior applications. Comprised of a wide range of designs and shades with its non-porous and hygienic textures, Staron includes the Tempest collection with high transparency properties and the Supreme with elegant and refined patterns.

### RELIABLE PERFORMANCE

- ◇ Cutting-edge technology that sets a new standard for interior applications
- ◇ Easily repaired due to the homogenous structure

### HYGIENIC SURFACE

- ◇ Non-porous surface that prevents growth of bacteria
- ◇ Resistant to heat and scratches
- ◇ Easy to maintain

### DIMENSIONAL FLEXIBILITY

- ◇ Can be thermoformed into three dimensional fixtures
- ◇ Excellent workability that creates various designs

### INFINITE RANGE OF COLORS

- ◇ Over 150 colors from natural to vivid palette tones featuring our collections: Tempest and Supreme
- ◇ Ongoing collaboration with color trend experts that keeps Staron on top of recent color trends and designs

### IMPERCEPTIBLE SEAMS

- ◇ Consistent color and texture on every sheet that provides smooth and seamless surface

### INTERIOR LUMINANCE

- ◇ Back-lighting effects created by altering the thickness of the material to allow transmission from a low-energy light source

### GLOBAL NETWORK

- ◇ Regional branch offices and global distribution networks in various countries

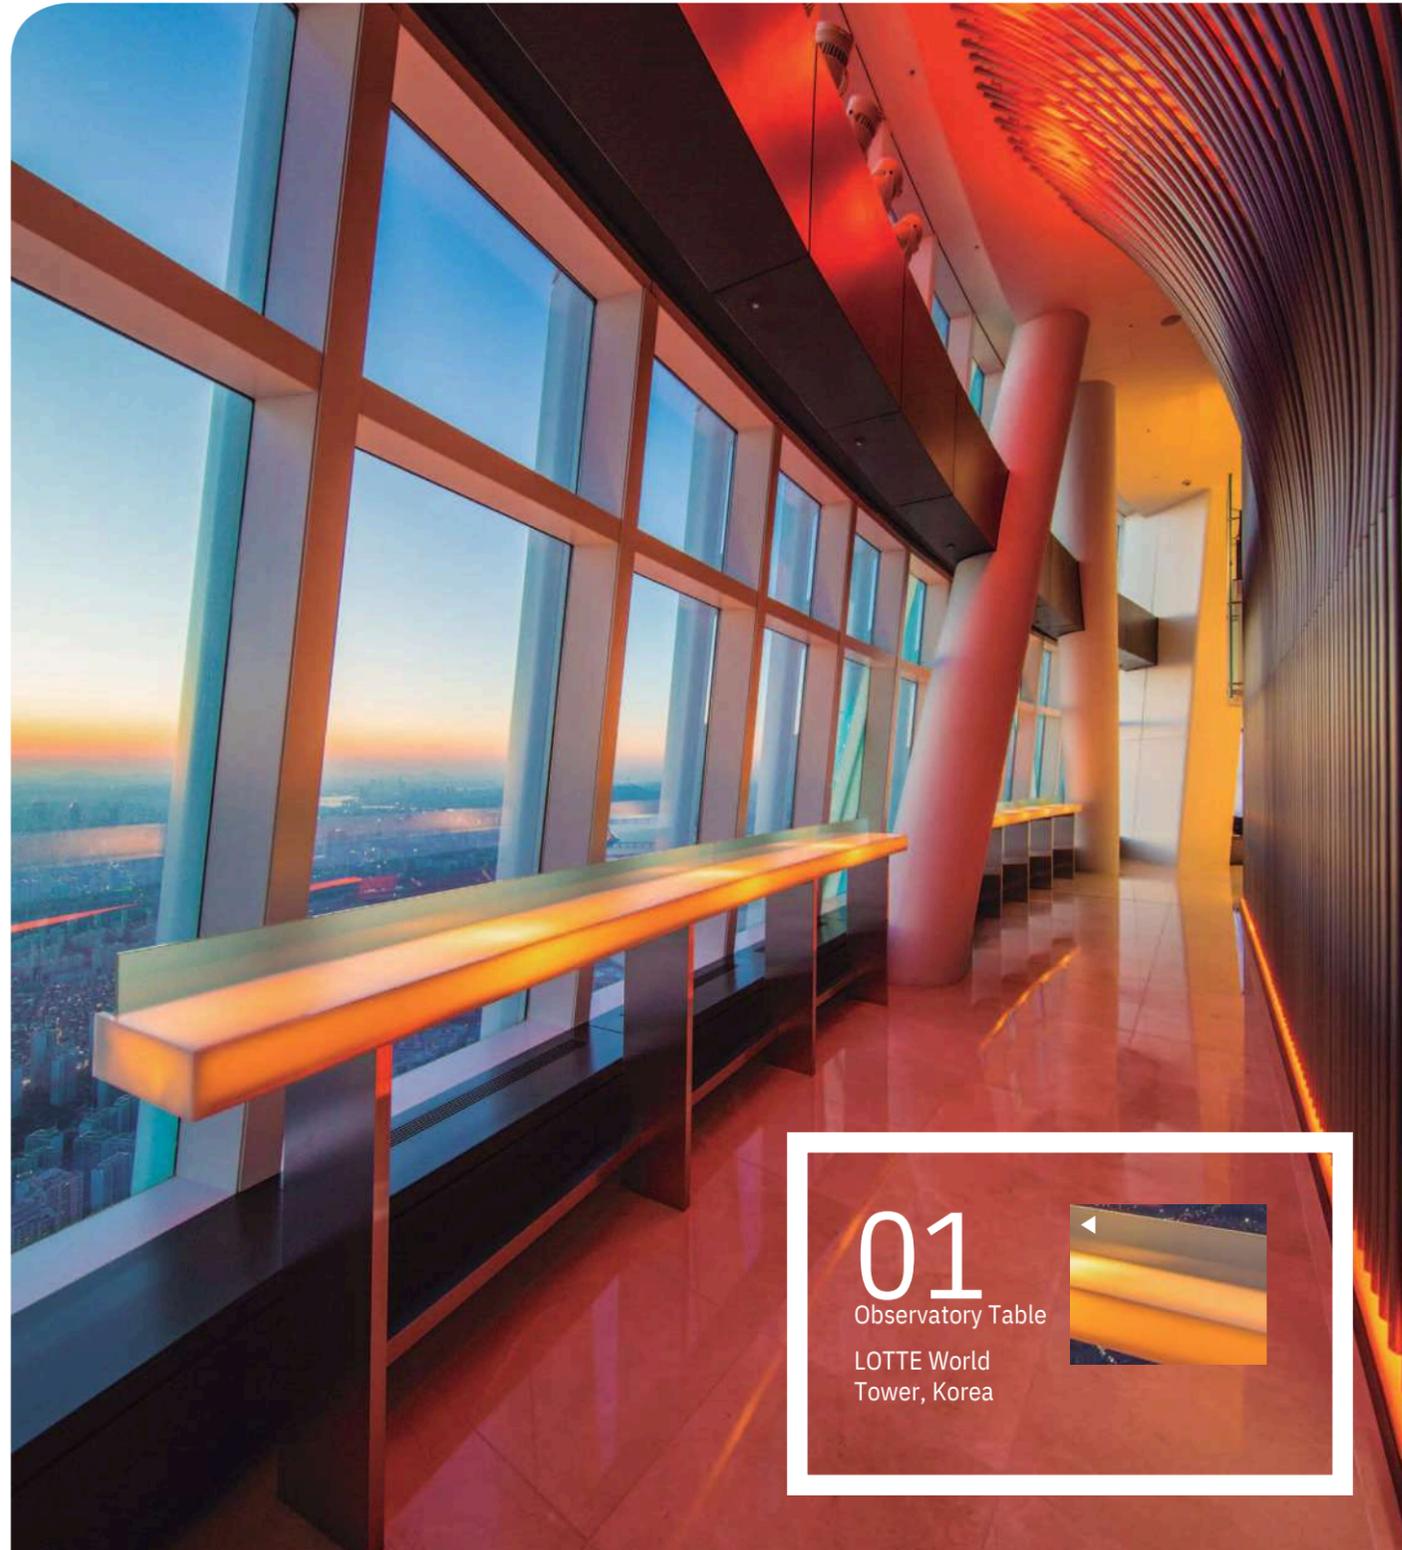

### EXCELLENT QUALITY

- ◇ High quality control policy and a commercial 10-year warranty
- ◇ Certified eco-friendly by Greenguard and Scientific Certification System

## ANTIMICROBIAL MATERIAL, SOLUTION FOR HEALTHCARE

evermoïn® anti-microbial surfaces from staron® can be applied to almost any interior space within a healthcare facility. Imagine casework, work-stations and wall-cladding in a functional and renewable material that is durable as well as ultra-hygienic. Achieve the perfect blend of simplicity in design in an anti-microbial surface engineered for a healthier life.

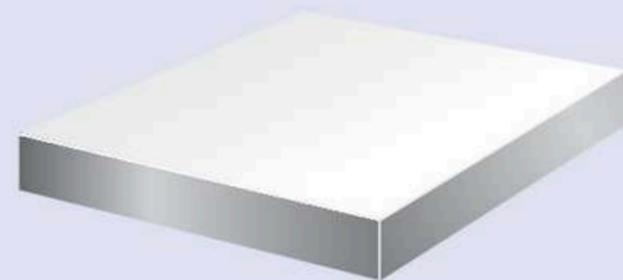

### Benefit of evermoïn®

Speedy antibacterial effect and action on representative bacteria and fungi

Excellent antimicrobial retention and Confirm quality stability and durability

Material certification harmless to human body and environment (NSF, FDA)

 ◇ These colors may require extra care and maintenance; consult with your Staron processor for the best use of these colors.

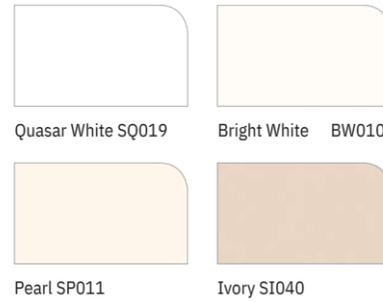

# SINKS & BOWLS

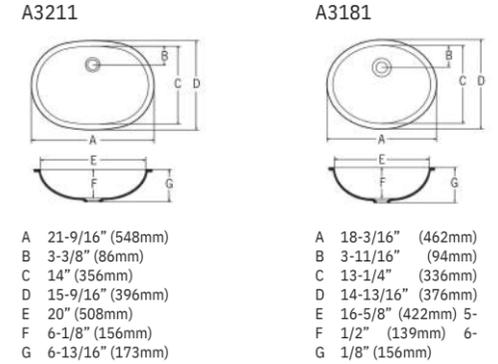

## ADA Compliant

Staron solid surface sinks and bowls are installed with the all-acrylic sheet in a seamless appearance for a smooth and polished fit. The continuous transition from sink to surface leaves no seams for bacteria or mold to accumulate and grow, thus Staron's nonporous solid surfaces are the most desirable choice for hygienic interior commercial applications. Staron sinks come in three following colors in ten popular models:
